PROFESSIONAL SUMMARY

Machine Learning Analyst with hands-on experience building and evaluating predictive models using Python and modern ML libraries. Strong foundation in data preprocessing, feature engineering, and model optimization, with experience applying techniques such as regression, classification, clustering, and transformations (e.g., Box-Cox).

Skilled in translating business problems into data-driven solutions, with a proven ability to work with real-world datasets and deliver actionable insights. Seeking an entry-level Machine Learning / Data Analyst role.

TECHNICAL SKILLS

Programming & Tools:

Python, SQL, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit

Machine Learning:

Supervised Learning (Linear/Logistic Regression, Decision Trees, Random Forest)

Unsupervised Learning (K-Means Clustering)

Basic Neural Networks

Data Techniques:

EDA, Feature Engineering, Data Cleaning, Outlier Handling

Encoding (One-Hot, Label Encoding), Normalization, Scaling

Statistical Analysis & Transformations (Log, Box-Cox)

Model Evaluation:

Cross-Validation, Train/Test Split RMSE,

MAE, Accuracy, Confusion Matrix

Other:

Data Visualization, Business Insights, Problem Solving

PROJECTS

Smart Food Demand Forecasting System

- Developed an end-to-end machine learning pipeline to forecast daily food hamper demand
- Engineered advanced features including lag variables, rolling averages, and seasonal indicators
- Trained and compared multiple models (Linear Regression, Random Forest) to improve prediction accuracy
- Applied Box-Cox transformation to handle skewed data and stabilize variance
- Implemented cross-validation techniques to ensure robust model performance
- Evaluated models using RMSE and MAE, improving prediction reliability
- Food demand app- <https://food-drive-mpulabzajnjghytusqwj35.streamlit.app> **Customer**

Segmentation (Clustering)

- Applied unsupervised learning to segment customers based on behavioral and transactional data
- Performed feature scaling and preprocessing to improve clustering performance
- Identified distinct customer groups to support targeted marketing strategies
- Visualized clusters to communicate insights effectively

End-to-End ML Pipeline

- Built a reusable ML pipeline for data preprocessing, feature engineering, model training, and evaluation
- Automated workflows using Python (Pandas, Scikit-learn) to improve efficiency
- Ensured reproducibility and scalability of machine learning processes

EXPERIENCE

Front Store Supervisor

Shopper's Drug Mart – Edmonton, AB | July 2025 – Present

- Supervise daily front store operations, ensuring smooth workflow and adherence to company policies.

- Lead, train, and motivate staff to deliver excellent customer service and maintain store standards.
- Coordinate staff schedules, task assignments, and breaks to optimize productivity.
- Handle escalated customer concerns and resolve issues promptly.
- Monitor inventory levels, merchandising, and promotional displays to drive sales.
- Oversee cash handling, POS operations, and compliance with health & safety regulations.
- Support management in implementing loss prevention measures and operational improvements.

Assistant Front Store Manager (In-Training)

Shopper's Drug Mart – Edmonton, AB | July 2025 – Present

- Assisted management in scheduling, merchandising, and daily store operations.
- Supported team coordination and monitored compliance with company standards.
- Provided leadership coverage in the absence of management to ensure continuity of operations.

Receiver & Merchandiser

Shopper's Drug Mart – Edmonton, AB | November 2023 – July 2025

- Managed deliveries, restocking, and inventory system processing.
- Trained and supervised new staff on merchandising procedures.
- Operated cash registers and processed customer transactions accurately.
- Assisted customers with product knowledge to enhance shopping experience.

Cashier

Circle K – Edmonton, AB | August 2023 – November 2023

- Delivered outstanding customer service while handling cash and credit transactions.
- Maintained store cleanliness and organized merchandise displays.
- Assisted customers with product inquiries and ensured a positive shopping experience.

EDUCATION

Diploma in Machine Learning Analyst

NorQuest College – Edmonton, AB | Graduated: April 2025

- Built and evaluated **supervised and unsupervised machine learning models**, including linear/logistic regression, decision trees, random forests, k-means clustering, and basic neural networks.
- Performed **data preprocessing and feature engineering**, including handling missing values, outliers, categorical encoding, normalization, and transformations (e.g., log / Box-Cox).
- Applied **model evaluation and validation techniques** such as train-test split, cross-validation, confusion matrices, RMSE, MAE, and accuracy metrics.

- Developed **end-to-end ML pipelines in Python**, using libraries such as **Pandas, NumPy, Scikitlearn, Matplotlib, and Seaborn** for data analysis and visualization.
- Conducted **exploratory data analysis (EDA)** to identify trends, patterns, and business insights from structured datasets.
- Worked with **real-world datasets** to solve business problems including demand prediction, classification, and customer behavior analysis.
- Designed and delivered **client-focused machine learning solutions**, translating technical findings into clear, actionable insights for non-technical stakeholders.
