

Dear Hiring Manager,

I am writing to apply for the IT Help Desk Support position with CloudOrbis in Leduc. With a background in Information Technology and Data Science, I am excited about the opportunity to contribute to a client-focused MSP environment where strong technical support and clear communication make a direct impact on business operations.

Through my academic and project experience, I have built a solid foundation in troubleshooting, system support, and working with technical tools and data. I have experience using Windows environments, Microsoft 365 applications, and working with networking and system concepts through coursework and hands-on projects. I am also comfortable learning new systems quickly and adapting to different tools and environments.

What interests me most about this role is the mix of technical problem-solving and direct customer interaction. I enjoy diagnosing issues, finding practical solutions, and ensuring users are supported in a clear and professional manner. I understand the importance of responsiveness, documentation, and follow-through in a help desk environment, especially in an MSP setting where multiple clients rely on consistent service.

I am particularly interested in building my career in IT support and cloud-based technologies. I have a strong interest in Microsoft 365, endpoint management, and cybersecurity fundamentals, and I am eager to deepen my knowledge in tools like Intune, Entra ID, and RMM platforms. I also bring a structured approach to problem-solving and a strong focus on communication, which helps me explain technical issues in simple terms to end users.

I would welcome the opportunity to contribute to CloudOrbis by providing reliable, customer-focused IT support while continuing to grow my technical skills in a fast-paced MSP environment. Thank you for your time and consideration—I look forward to the opportunity to speak further.

Sincerely,
Malhar Singh
